Disha Prajapati

Python Developer | Backend Developer

✉ dishap277@gmail.com   📞 8160480954   📍 India   in prajapati-disha   ⬡ dishagitt

Summary

Motivated Trainee Engineer gaining hands-on experience in Python, Flask, FastAPI and Django. Skilled in developing and optimizing backend features, RESTful APIs, and secure authentication systems. Passionate about building scalable applications and contributing to impactful software solutions.

WORK EXPERIENCE

Skyttus Private Limited

Trainee Engineer   Aug-2025 - Present

- Developed and maintained backend systems using Python, Flask to support RESTful API services.
- Designed and optimized databases using SQLite and SQLAlchemy ORM for efficient data handling.
- Integrated JWT and Google OAuth authentication for secure and scalable access management.
- Utilized Object-Oriented Programming (OOP) principles to improve code modularity and maintainability.

EDUCATION

L. D. College of Engineering, Ahmedabad

Master of Computer Applications - 8.52   Aug-2023 - May-2025

Rofel Shri G. M. Bilakhia College of Applied Sciences, Vapi

Bachelor of Computer Applications - 8.11   Aug-2020 - May-2023

SKILLS

Programming Languages: Python, JavaScript
Frameworks & Libraries: Flask, FastAPI, Django, React, Tailwind CSS, Bootstrap
Web Development: HTML5, CSS3, RESTful APIs, JWT Authentication, Google OAuth
Databases: MySQL, SQLite
Tools & Platforms: Git, GitHub, Postman, ,VS Code
Core Concepts: Object-Oriented Programming, Version Control, Debugging, Deployment
Soft Skills: Teamwork, Communication, Problem-Solving, Time Management, Adaptability, Continuous Learning, Attention to Detail

PROJECTS

QR Code Generator ↗   2025
- Built **a Flask-based** QR Code Generator to create secure **QR codes** for URLs and text data.
- Enhanced user experience with **real-time generation** and **download** functionality.

NoteNest ↗   2025
- **Developed** a full-stack notes application using **Flask**, **HTML**, **Tailwind CSS,** implemented **JWT** and **Google OAuth** for secure user authentication.
- **Integrated Flask-Mail** for email OTP and **designed/optimized SQLite database** for efficient note storage and retrieval.

HandmadeCharm (E-commerce platform) ↗   2024
- Developed **seller modules** for product listing and management features using **Django**, **HTML**, **CSS- , JavaScript**, and **Bootstrap**.

FashionHub – Online Clothing Platform for Single Vendor ↗   2023
- Built **customer and seller panels** using PHP, HTML, CSS, JavaScript, and MySQL.
